The Sugar Situation

America, which made exports of 140,-000,000 bushels of wheat in the closing crop year, where less than 20,000,000 bushels surplus appeared, is called upon now to exercise like virtue with sugar. The burden of maintaining Allied supplies falls on our resources.

No sugar comes from Central Europe, none from Java; from Hawaii and West Indies less than usual. French sugar territory is overrun by German armies; French sugar mills are

taken and destroyed. Submarine sinkings and losses by battle have cost us great stores; labor shortage makes inroads on production.

For England the allowance is two pounds of sugar a month; for France, one pound; for Italy, one pound. America seeks to share equally with all who sit at the common table, joined in the common defense.
